

Professional development for Property Managers

The Property Management toolkit is a go to resource to support those working in property management, rental providers or case workers supporting renters.

Did you know the Bethany Health Promotion & Prevention team can design professional development sessions tailored to your specific requirements?

Topics we can cover in Professional Development include:

- Working with tenants whose tenancies may be at risk
- How to recognise and respond to family violence
- How to respond to the specific rights and obligations under the Residential Tenancies Act 1997
- What does a family violence safety notice, family violence intervention order or personal safety order mean in relation to a tenancy?
- Can a person who is experiencing family violence apply to end the rental agreement early?
- What support services are available to people in the Barwon region?
- How to refer to Bethany Community Support
- What services can Bethany provide relevant to your role/work?
- What is PRAP?
- How can PRAP support renters?
- How can emergency relief be accessed and who can access ER?
- What if I learn a tenant has been affected by gambling harm?
- What services are available for someone affected by gambling harm?
- What is an 'affected other'?

If there are other areas of concern you would like to address, we can work with you to tailor Professional Development to meet your organisational needs.
